PROFESSIONAL PROFILE

QA Engineer with **4+ years of experience** in manual testing, API validation, and user flow analysis across digital products. Specialized in identifying critical issues, debugging complex scenarios through network analysis, and ensuring high-quality releases. I collaborate closely with product and engineering teams to improve user experience and system reliability.

EXPERIENCE

QA / Product Collaboration · Startup ecommerce (confidential client) · Part-time · Remote

Sep 2025 — Present

- Owned end-to-end quality and testing process for an ecommerce product.
- Performed API testing and network analysis to support product stability.
- Identified UX improvements from testing insights, influencing product direction.
- Prioritized bugs and features based on user impact and business value.
- End-to-end manual testing of an ecommerce platform across key user flows.
- Identified and documented bugs, UX issues, and edge cases in checkout and product flows.
- Delivered structured bug reports prioritized by severity and business impact.

QA Engineer · RebelMouse

Mar 2022 — May 2026

- Executed end-to-end manual and regression testing across enterprise client deployments, **catching critical bugs before they reached production**.
- Performed API testing and network analysis using Postman and DevTools to identify faulty endpoints and integration issues.
- Prioritized bugs by severity and business impact, reducing resolution time for enterprise clients.
- Collaborated with PMs and developers from requirements to release, flagging ambiguities before development started.
- Performed exploratory testing across complex user flows, identifying edge cases not covered by formal test cases.

★ Featured Case — Penske Truck Leasing

Discovered a critical bug in Penske Truck Leasing's reservation flow — the **core revenue feature**. Analyzed network requests, identified a faulty API endpoint, and escalated with full business impact context. Resolved within hours, restoring the primary rental flow for an enterprise client.
